Flat Rock Assembly Plant

Steve Gonzales, UAW Local 3000, President
Ken Tomalak, UAW Local 3000, Chairman
Bargainers, UAW Local 3000

Union Brothers and Sisters,

We as the Sub II leadership understand what is at stake with our upcoming National Negotiations and also understand the **Leadership Team that needs to be in place in order to have the ability to achieve successful benefits for our entire membership.** We came together July 2021 on one accord to bring leverage and power in the Sub II Resolution in to order to support Vice President Chuck Browning. In that support we were able to force Ford Motor Company to correct some of the wrongs from the past, such as making our TFT members to Full-Time Members and correcting the Leap Frog issues, to name only a few. These resolved issues, along with others, would not have been possible if we did not obtain the support of Vice President Chuck Browning.

As leaders in this position, we have multiple levels of experience but together we have one of the strongest leadership teams and longest tenure in our Sub II history. One of the most important factors that we must convey to the membership as a whole is that we have the favorable opportunity in being the lead company in the upcoming negotiations. President Ray Curry supports Vice President Chuck Browning 100% in his leadership capabilities and his proven experience through which we have seen in his most recent negotiations with John Deere. This is why we must support and elect International President Ray Curry and Vice President Chuck Browning to continue moving the International UAW forward.

In closing, our highest priority remains our membership! With our continued support of the Ray Curry Solidarity Team and Vice President Browning's expertise, knowledge and support in the Collective Bargaining Agreements, we can take the lead in the Big 3. Please remember to read and return your ballot. If you have any questions reach out to your local leadership.

Thank you for your time and Solidarity
