

Greetings United Aerospace Workers,

We, the below undersigned members of your UAW Aerospace Council implore you to cast your vote in the January International UAW Presidential race for Ray Curry. Since taking office in June of 2021, President Curry has given us Aerospace workers the attention we have been seeking. Ray has created an Aerospace Council where we have an audience with him and his staff to discuss our industry's unique challenges and provide training and networking like never before. He has doubled the Aerospace Department's staff to better service us and bargaining, arbitrations, grievances, and lobbying efforts for new work. Ray's vision and resource commitment for Aerospace is what we have all been asking for. This is proven by the recent lobbying efforts on behalf of our members at Bell Helicopter and Rolls-Royce Engines that led to the award of a massive contract to replace the military's capital Blackhawk helicopters with Bell's V-280. Let us not fall back but continue moving forward with President Ray Curry. He has shown he has our backs, now let's have his.

In Solidarity,

Daniel Martin
